Step-1: Team Gathering, Collaboration and Select the Problem Statement

1

Team gathering & problem statement

The team met online and in person to agree on the focus of the project. We selected the problem of **unreliable, disconnected hotel booking and management**: guests face outdated room availability and unclear bookings, while hotel staff struggle to manage rooms, reservations and check-ins across separate tools.

Key question: How might we give guests a fast, trustworthy way to book rooms while giving hotel staff one simple system to manage everything?
