Project Design Phase

Solution Architecture

Date	27-10-2026
Team ID	
Project Name	Hotel Management and Booking System

Solution Architecture:

The solution architecture for the **Hotel Management and Booking System** ensures a robust, user-friendly, and scalable platform that connects guests with hotels and helps hotel staff manage daily operations. The architecture focuses on responsive design, secure payments, real-time room availability, and automated notifications to ensure smooth reservations and high guest satisfaction.

- Seamless room search, availability check, and online booking
- End-to-end reservation lifecycle management (booking, check-in, check-out, cancellation)
- Scalable user authentication and role-based authorization for guests, staff, and admins
- Secure and trackable payment and billing transactions
- Reliable real-time availability updates and email/SMS notifications
