Customer Problem Statement Template:

To define the core problems that guests and hotel staff face while booking rooms and managing hotel operations, and use those insights to guide the development of HotelPro.

Customer Problem Statement Template

I am	I'm trying to	But	Because	Which makes me feel
A traveller or hotel guest looking to book a comfortable room online quickly.	Find available rooms, compare prices and confirm a booking without confusion.	Booking sites show outdated availability, hidden charges and offer no easy way to manage bookings.	Hotel systems are disconnected and lack real-time room updates and a simple booking flow.	Anxious and frustrated, unsure whether my reservation is truly confirmed.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a traveller planning a hotel stay.	find and book an available room at a fair price quickly.	the availability shown on many platforms is often outdated or wrong.	room data is not updated in real time across booking channels.	frustrated and uncertain about my reservation.
PS-2	a hotel manager.	manage rooms, bookings, check-ins and guest records in one place.	I have to juggle spreadsheets and separate tools.	hotel operations are not connected to a single management system.	overwhelmed and worried about double bookings and errors.
PS-3	a guest with a change of plans.	modify or cancel my booking and see my booking history easily.	the process is slow, unclear and often needs phone calls.	most platforms give guests very limited self-service options.	powerless and annoyed at the wasted time.
PS-4	a hotel receptionist.	check availability and confirm walk-in or online bookings fast.	records are manual and prone to mistakes.	there is no simple dashboard showing live room status.	stressed and unable to serve guests efficiently.
