Project Overview:

Project Name: HotelPro - Complete Hotel Booking and Management

Description: A web-based platform (MERN stack) that lets guests search for hotel rooms, check real-time availability, book and pay online, and manage their bookings, while hotel staff and admins manage rooms, reservations and guest records from one dashboard.

Project Version: v1.0.0

Testing Period: 2026-10-12 to 2026-10-19

Testing Scope:

- User registration and login
- Guest and admin profile management
- Room search and filter functionality
- Real-time room availability check
- Room booking and booking confirmation
- Payment gateway integration
- Booking status updates (e.g., booked, checked-in, completed, cancelled)
- Admin room and booking management
- Review and rating system

Requirements to be Tested:

- As a guest, I want to search and book available rooms easily.
- As a guest, I want to view, modify or cancel my bookings.
- As a user, I want secure login and payments.
- As a hotel admin, I want to add, update and manage rooms and reservations.
- As a hotel admin, I want to view guest details and booking reports.

Testing Environment:
